CL2019: GUIDELINES FOR FINAL VERSION OF THE ABSTRACTS

We will publish the extended abstracts for CL2019 electronically (on the website and app) in advance of the conference, and we now request you to submit a revised version of your abstract. Firstly, you will need to de-anonymise the abstract, include new data or findings if applicable and make any changes that were suggested by the reviewers (if any feedback was provided – please note that most reviewers did not provide feedback, and those who did only provided brief comments/recommendations).

The deadline is **April 1st 2019** and all texts are to be written in English. The following are guidelines for the presentation of the final extended abstract.

1. **Format and length**

Manuscripts should be submitted in .doc format. The maximum length of extended abstracts should be as follows (excluding references):

- 750-1500 words for full papers
- 250-500 for posters
- 1500 for panels

We kindly request all authors to respect the word limits. Authors of extended abstracts that exceed 1500 words will be asked to edit them down to the word limit.

2. **Fonts, text, size, line spacing and indentation**

Tahoma font should be used throughout the document, including in figures and tables. The size and style of the font are as follows:

- Title: 14 pt., bold, centred
- Author name and affiliation: 14 pt, centred
- References heading: 12 pt., bold, left aligned.
- References: 12 pt, justified.

Use single line spacing throughout the manuscript. A paragraph indent of 1.25 cm is applied for all paragraphs except the first one in a section and after white spaces (examples, tables, figures, etc.).

3. **Examples**

Examples in the text (individual words or short sentences) should always be in italics, e.g. *house* or *the house on the tree*. Longer examples should be indented and numbered. Some examples follow:

1. You *must* have some of this cake.
2. You *should* have some of this cake.
3. You *may* have some of this cake.
4. You *will* have some of this cake.
Indented examples, like Examples (1) to (4) above, do not need italics. However, italics can also be used for emphasis, as shown with the word must, should, may, and will.

4. References

The References section should appear at the end of the manuscript. Make sure that all references cited in the text are included in the list of references, and that the list does not include any entries that have not been cited in the text. References should be listed (i) alphabetically and (ii) chronologically, in the case of more than one publication by the same author(s). Tahoma, size 12, line spacing 1, is used with references, with 1.25 cm hanging indent.

APA 6th (www.apastyle.org/) is used as reference style. Please make sure that your reference list follows as strictly as possible APA 6th guidelines.
